

Item dimensions (cm): **90 x 90 x 11,4**
 Item weight (kg): **9**

Pallet dimensions (cm): **93 x 120 x 205**
 Pallet gross weight (kg): **220**
 Quantity per pallet (pcs): **20**

Quantity per box (pcs): **1**

Technical characteristics

MASPI's products are made with a special technology which allows us to produce structural items with very high thicknesses, avoiding any surface flaws such as suction marks

Our products are in **Restylon®-S**, a *Structural Technopolymer*. This material provides the following characteristics: high stiffness, high thickness, good impact resistance, high gloss, antistatic behaviour, excellent UV-resistance, good scratch resistance, good chemical resistance to common detergents, smooth surface and high dimensional stability in a wide range of temperatures (from -30°C up to + 70°C). The product is also completely recyclable at the end its life.

Features

The structure of our items is based on two components: a selected recycled and compatible material in the core and a high quality Acryl-Styrene compound on the surface. Its composite structure combines solidity, beautiful appearance, high impact resistance and a warm and smooth surface. Moreover, it guarantees colour stability.

Guarantee

Our items are guaranteed for 5 years; we provide the customer with some basic instructions for cleaning. It is important NOT to use any abrasive and/or hard or sharp edged tools while cleaning the surface of the product. Water, a soft sponge and a non-aggressive soap will assure cleaning without any damage to the surface.
