

Model: **KOSMO**
Article-Code : **1400.01.B.CO**

Item dimension (cm): **45,5 x 35,5**
Item weight (kg): **3,0**

Pallet dimension (cm): **100 x 120 x 220**
Pallet gross weight (kg): **552**
Quantity in pallet (pcs): **180**

Quantity per box (pcs): **5**

Technical characteristics

MASPI's products are made with a special technology which allows the production of structural items with very high thicknesses, avoiding any surface flaws such as suction marks.

It is made of Restylon®- S, a Structural Technopolymer. This material provides the following characteristics: high stiffness, high thickness, good impact resistance, high gloss, antistatic behaviour, excellent UV-resistance, good scratch resistance, good chemical resistance to common detergents, smooth surface and high dimensional stability in a wide range of temperatures (from -30°C up to + 70°C). This product is also completely recyclable at the end its life.

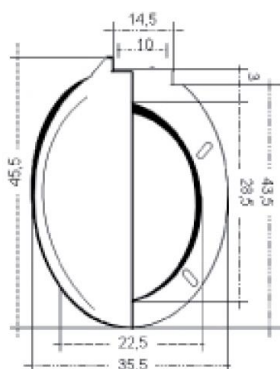

Features

The structure of our items is based on two components, a selected recycled and compatible material in the core and a high quality Acryl-Styrene compound on the surface. Its composite structure combines solidity, beautiful appearance, high impact resistance and a warm and smooth surface. Furthermore, it assures stability to the colour.

Guarantee

Our items are guaranteed for 5 years. We provide the customer with some basic instructions for their cleaning. It is important *NOT* to use any abrasive and/or hard or sharp edged tools while cleaning the surface of the product. Water, a soft sponge and mild soap will assure cleaning without any damage to the surface.
